

Blast Mitigation

Composite Reinforcement Solutions offer superior protection from explosive threats:

- Accidental explosions
- Terrorist bomb threats
- Forced entry
- Natural hazards, wind, seismic
- Conventional weapons
- Structural Damage - Non Blast Related, Trucks, Etc.

Benefits of V2's Composite Reinforcement Solution

- Extends structural collapse time
- Extreme temperature tolerance
- Improves stand-off distance & charge load resistance
- Higher pressure rating & duration
- Enhances structure's ability to withstand threats and normal abuse beyond original design
- Longer lasting solution than conventional methods
- Stronger, lighter, faster and easier to install
- High fatigue & corrosion resistance
- High PSI ratings
- Versatile
- **Significantly lower installed cost**
